

**To Airline Operators at Copenhagen Airport - to whom it may concern!**

The budget for ACD – Airport Coordination Denmark A/S – has been approved and the final charges for 2021 will be as follows:

DKK 11,00 per turn-around for runway constraints.  
DKK 3,80 additional charge per turn-around for CPH Go.  
Total charge DKK 14,80 per turn-around for CPH Go.

As traffic has gone down by 62.3%, we have been working hard to reduce ACD's operating costs. We have now succeeded in lowering these by 32.5%. In addition, unfortunately, we have to state that there will be no profits from 2020 to be transferred as a prepayment into the 2021 financial accounting. Naturally, we hope that traffic will soon be normalized so that prices can be reduced again.

We regret this increase, which of course is due to the unfortunate consequences of the worldwide Corona Covid-19 pandemic.

The slot charge will apply to Copenhagen Airport and the charge will as previously be invoiced on behalf of ACD by Copenhagen Airport A/S as a specific charge per departure in addition to the airport charges.

On top of the amount collected from the operators – Copenhagen Airport A/S will continue; as they have done since 1996 – to finance the other half of the costs.

ACD is a nonprofit company, and we will always be working with estimates of operations for the next 12 months, so please be aware of the fact – that the charges could either increase or decrease over the year.

Best regards

Frank Holton  
Managing director  
ACD - Airport Coordination Denmark A/S
