

SLOT coordination charges with effect from 1st of January 2023

To Airline Operators at Copenhagen Airport - to whom it may concern!

Dear airline customer,

The budget for ACD – Airport Coordination Denmark A/S – has been approved and the final charges for 2023 will be as follows:

SLOT COORDINATION CHARGES - DKK	2023	2022	2021	2020	2019
Runway constraints (Per turn-around)	7,60 DKK	10,50 DKK	11,00 DKK	5,26 DKK	5,26 DKK
Additional charge for CPH Go (Per turn-around)	3,80 DKK	3,80 DKK	3,80 DKK	2,63 DKK	2,63 DKK
Runway constraints for CPH Go (Per turn-around)	11,40 DKK	14,30 DKK	14,80 DKK	7,89 DKK	7,89 DKK

DKK 7,60 per turn-around for runway constraints.

DKK 3,80 additional charge per turn-around for CPH Go.

I.e. Total charge DKK 11,40 per turn-around for CPH Go.

Fortunately, the number of movements is growing - however not yet to the 2019 level!
We can therefore lower the runway constraints price by DKK 2,90 ~ almost with 28 percent, even in these times of rising inflation
The additional Go/Parking charge will be unchanged.

Naturally, we hope that traffic will soon be normalized so we as a minimum can maintain the prices in 2024.

The slot charge will apply to Copenhagen Airport and the charge will as previously be invoiced on behalf of ACD by Copenhagen Airport A/S as a specific charge per departure in addition to the airport charges.

On top of the amount collected from the operators – Copenhagen Airport A/S will continue as they have done since 1996 – to finance the other half of the costs.

ACD is a nonprofit company, and we will always be working with estimates of operations for the next 12 months, so please be aware of the fact – that the charges could either increase or decrease over the year.

Best regards

Frank Holton

Managing director

ACD - Airport Coordination Denmark A/S
